

包装危险货物技术说明书
Technical description of Dangerous Goods in Packaged Form

货物正确技术名称 Correct technical of the goods	(中文) Chinese	商业名称 Trade name		生产单位签章(包括生产单位主管部门) Manufacturer's seal (including administrative department of manufacturer)
	(英文) English			
联合国编号		主要成分(分子式) Main components (formula)		
理化性质和主要危险性* Physical and chemical properties and main hazards.				鉴定单位意见:(可付相关证明代替) Remarks by testing organization
产品用途 Purposes of the product				
包装方法** Packaging				
船舶装运安全措施与注意事项 Safety measures and precautions for carriage by ships.				托运单位: Shipper:
急救措施 Emergency medical treatment.				
灭火方法 Method for fire fighting.				托运日期: Date of shipping:
撒漏处理方法 Method to deal with leakage.				
<p>注: *单一物质注明分子式, 混合物注明主要成分。 性质应包括状态、色、味、比重、熔点、闪点、爆炸极限、中毒最大浓度、致死量及危险程度、并附技术检验部门的检查报告。 该种货物本身危害特性和与其它货物的相容性, 说明在遇到某种货物时易发生的危险。 Formula should be indicated for a single substance and main components for a mixture. Properties should include state, color, odour, melting point, flash point, explosion limits, poisonous concentration, LD₅₀/LC₅₀ The testing reports issued by technical inspection organizations should be attached. Compatibility between the cargo and others; description of the danger of the cargo in contact with others. ** 包装方法应说明包装的材质、状态、厚度、封口、内部衬物、外部加固情况及单位重量等。 Packaging should include: material, state, thickness, closure, inner lining, outer securing and unit weight.</p>
